**Database Management Systems Laboratory Experiments
Phase 2**

Subject: Create Table and View

Submission Date: 16.11.2012

Due Date: 29.11.2012

Teaching Assistants: Alaettin UÇAN, Cemil ZALLUHOĞLU

Introduction / Aim:

The aim of this phase is to implement creating objects and inserting data, learn how to write sql code using an interface and understand the logic of using views.

Details:

Creating the objects which are determined in your first phase of your projects. Doing that part you will learn how to connect database and write SQL codes using an interface. You can use MYSQL , ORACLE , MSSQL etc.

In this phase

- You must create all tables that you determined in the first phase
- Create minimum 10 views
- You must refresh your design and ER diagram and attach your *.PNG files in your report.
- Tables must be created being careful about primary and foreign keys possible screen shots taken from project, must be considered when creating views.

Grading

In this phase you will get 20 points over a hundred in your final work.

NOTES AND RESTRICTIONS:

- 1- You tell us your project with your own words. Report language must be in English.
- 2- You are expected to do this experiment on a hard copy as a report.
- 3- Your experiment must be submitted before due date. Late submissions will not be accepted
- 4- The assignment must be original, **group** work. Modified experiments will be considered as cheating. But one of the group member will submit their files.
