Database Management Systems Laboratory Experiments
Phase 1

Subject: An implementation of ER Diagram
Submission Date: 12.10.2012
Due Date: 02.11.2012
Teaching Assistants: Alaettin UÇAN, Cemil ZALLUHOĞLU

Introduction / Aim:
The aim of this phase is to understand and implement a Relational Database Model

Problem
The first phase of the final project that consists of three phases, you are expected to define relations between entities are planned to exist in your database model with each other.

NOTES AND RESTRICTIONS:
1- You tell us your project with your own words and attach your ER Diagram which related with your project.
2- You are expected to do this experiment on a hard copy as a report.
3- Your experiment must be submitted before due date. Late submissions will not be accepted
4- The assignment must be original, **group** work. Modified experiments will be considered as cheating.
5-Your ER Diagram must be including 15-25 tables.
